Chalice West Drilling Completed

Highlights of this Announcement

- Drilling program completed on 22 November 2022.
- 227 aircore holes drilled for 7200 metres.
- Based on pXRF analysis, 378 samples have been selected for testing of nickel or proxies for lithium and rare earths.

The Announcement

Auric Mining Limited (ASX: **AWJ**) (**Auric** or **the Company**) is pleased to announce the Company's Chalice West Project drilling program near Higginsville-Widgiemooltha, Western Australia was completed on 22 November 2022. A total of 227 aircore holes have been drilled for 7200 metres.

All samples were submitted as 4 metre composites for gold analyses and the bottom-of-hole composites for a suite of 48 additional elements. Onsite pXRF testing was completed for nickel and other elements, including proxies for lithium and rare earths. pXRF was used as an objective basis for selective sampling and associated multielement laboratory analysis.

As at the date of this announcement, 1870 composite samples together with 378 selected single-metre samples have been delivered to Intertek Genalysis for analysis. Auric will update the market promptly regarding the results. It is anticipated that the initial results will be announced mid-December 2022.
